

IMPORTANT INFORMATION

When an injury or death has been caused by the fault or negligence of another person, company or defective product, choosing the right attorney to represent you and your family is one of the most important decisions you can make. An experienced personal injury attorney will evaluate the merits of your case and advise you of your legal rights. The Shanks Law Firm will do this at no cost or obligation to you.

It is important that you meet with an attorney before you talk with any insurance adjusters. You want to make sure that you don't do anything that might later jeopardize your case. Never give a statement to an insurance adjuster or sign a medical authorization form without first consulting with an attorney.

The Shanks Law Firm can help you determine whether you have a case. We have the experience and legal knowledge to fully investigate your claim to determine who was responsible and to ensure that you are fairly compensated for your harms and losses.
